It's time to get to know thyself...

with our Signature Course,

Metaphysical Principles

starting Saturday Sept 4th.

Class each week will be on Saturday 12pm.

This course is a 10 month course.

Certifications of specific training is included.

Contact Rev David or Rev Angela to sign up.

PHYSICAL PHENOMENA

Physical Phenomena is the psychic development that requires the physical body. The physical mediumship developed is one where the spirit world uses the physical body to communicate with the Earth plane. The gifts are: Direct Voice and Writing, Telekinesis, Levitation, Materialization, Teleportation, Apports, Psychic Photography.

In the early days of psychic development there was a need for proof that the continuity of life and the communication with that continuity was a fact. There was an ignorance of the spirit world. The spirit world wanted to let the Earth plane know that it had become material minded.

Telekinesis is the movement of objects with no physical means. Raps and knocking are an example of telekinesis.

Levitation is the raising of objects, including the body. This is done by no physical means. To levitate one's body, the aura changes so that gravity changes. The body chemistry and aura energies allow this to happen.

Direct Voice is when spirit entities temporarily use the voice box of the medium.

Direct Writing/ Slate Writing is writing on objects without any physical means. The medium is in a trance state when this is taking place.

Psychic Photography is figures, marks and pictures on a white paper. This is not done with a camera. There is a special paper that is similar to Polaroid paper. To get good results, use a red light and place the paper on the Solar Plexus area of your body.

Apports and Teleportation. Apports are objects that appear or disappear. The objects make a passage through matter

and this is called Teleportation. The objects existed in another part of the Earth plane or in the Etheric world. The objects lose their physical shape, but that form is still in the Etheric.

Materialization is the forming of a spirit entity in the Earth plane in the physical form of their last incarnation. This is done through the use of ectoplasm, which is a substance that is in everyone. The medium uses the ectoplasm from all people that are in the presence of the medium. The ectoplasm that is developed in the medium is of a larger quantity. Materialization was used in the beginning of modern spiritualism to prove the continuity of life. When a person who has made the transition, called death, can materialize and talk intelligently with someone who knew the spirit entity in the Earth plane. This is a high quality of proof. The medium sits in a cabinet, which is made of dark cloth. A red light is used, so when the materialization is being done, all can see the spirit entity. When the entity has completed his/her communication, the entity dematerializes back into the cabinet or disappears right through the floor. Materializations in some cases are spontaneous, with no premeditation. This can happen walking down the street or in the woods. The preferred way is through controlled situations, like a development class.

Materialization can be dangerous if done in ignorance, or with the wrong motive, or without a developed medium. The development of a trance medium can take five to ten years. When one has developed the gift, it is up to the medium to continue to develop more. One's personal attitude is very important. It is to be of the highest and best for all concerned. Nothing happens if the environment is strained, tense, fearful, or emotional and philosophically confused. One needs to relax, think of spirit as in another room of the universe, just like a person on the Earth plane. Becoming excited will also slow development. Ask for the highest and best at all times. Development of physical phenomena requires one to be strong and have a thick skin.

OBSESSION AND POSSESSION

Obsession is the state of being possessed by one idea to the exclusion of other ideas. It is a persistent disturbing preoccupation with an often unreasonable idea or feeling. Obsession is the complete absorption of the mind until it is so firmly and strongly fixed that it takes control of your presence or being.

Obsession leads to anger and greed. These states of consciousness when allowed to become dominant are the "demons" to be cast-off out.

Possession is the act of having or taking control of, or the domination of, one entity by another. Possession is when the personality is replaced by another personality. One is occupied, controlled or mastered by some spirit. An outside spirit is powering one's body.

LIFE IN THE SPIRITUAL WORLD

The Spiritual world is in the Etheric or Celestial heaven known as the "Mythical Being". The Spiritual world is immaterial, not consisting of matter, impalpable and not able to be physically touched.

The activity in the Spirit world is tremendous. The amount of activity that one knows about depends on one's development level.

In the Spirit world there are planes of understanding and they range from high to low. In the lower planes, ignorance, lack of understanding, low consciousness, lustful desires are some of the vibrations.

The Higher world has Sages and other wise entities that can be of assistance in one's evolution. Example, Plato on the Earth plane has its counterpart in the Etheric.

There are centers of learning in the Spirit world where one can be educated on many different things. These centers help one purify and refine the soul.

In the Spiritual world, travel and communication are done through telepathy. Your consciousness determines what plane you will be on in the Spiritual world. The plane one is on is who one really is. This does not differ from the Earth plane. One thinks one can hide who they are in the Earth plane, but the people they associate with, the places they go to, and the actions they do show the consciousness of that person.

The Spiritual influences upon Earth are many. The loved ones who have just made their transition are just one of the influences. It is important not to disturb the ones who have just left the Earth. They need time to adjust to their new world and for the one who is still in the earth plane, also needs time to adjust. When the loved one has made the adjustment, they will communicate back to the ones on the Earth plane who need to know how they are doing and let them know. The loved one will come in dreams, meditations, or through the psychic gifts one has developed.

There are Teachers, Masters and Guides in the Spirit world that can have an important influence in one's life. They are called your "band". Remember not to depend on these Spirit entities to do your work, when you can do it yourself.

In this circle of influence, one has Spirit Controls, Guides, and Mentors. Spirit Controls are protectors and control the Spirit world around one when one is in trance and meditation. The Guides help one when traveling in the Earth plane influencing the moves in one's life. The Guides give help in financial matters, work, education, etc. The Mentors give knowledge that can be of

assistance in one's life plan. The development of communication with the Controls, Guides and Mentors takes years! When developed, these Controls, Guides and Mentors will be able to communicate through one to the physical world. It is important to seek the I AM - Consciousness.

Trance is the physical phenomena where the Controls, Guides and Mentors communicate with the Earth plane directly through a medium. It is very important to know thyself. When one knows oneself, one knows the environment one is in. When the environment is happy, healthy, and wealthy, the development of trance will advance. The development of trance takes time so go slow. Take the time to get know your Controls, Guides and Mentors.

The nervous system and vital organs are affected in the development of trance. If done too quickly, one could become unstable mentally. This could lead to taking alcohol or other drugs to feel calm. When development is done properly, one's breathing changes. The breathing rate can calm one when things are going too rapidly. Use proper breathing in place of drugs. The diet one has will change. The Guide will usually give this information to one. One will learn to fast to reduce internal waste and raise the vibration enough to be able to have the Mentors come through one to communicate with the physical world.

The importance of having Mentors use one's body while in trance instead of loved ones is that the Mentors have so much more information to give for the advancement of evolution. Remember the loved ones are still adjusting to the Spirit world. This adjusting is taking care of the diseases they had while in the Earth plane.

Quiet time or meditation is essential when developing the trance state. Meditation is best done when one is not tired. Always ask for the highest and best and protect oneself with the highest and best.

If development is done improperly damage can occur mentally and physically.

One is the controlling factor. The Spiritual entities are in the Spiritual world and human beings are still in the physical world. Remember that one has chosen the physical world to do the experiences of the Earth plane. Do not let the Spirit world live one's life. You live it.

The Spiritual world does not know all that is correct for one. They are to assist in one's growth and development, not to do it for one. Your mission is in correct alignment with that of your Mentors, Guides and Controls. As one grows, so your team grows!

Come Join us for Physical Phenomena Course

Wednesday Sept 1st , 2021 6:30pm
(additional classes are Sept 8th, 15th, 22nd, and
29th)
\$15.00 per class (5 Classes)

Reincarnation

Metaphysical Principles

Sept 4th Saturday 12pm

*If you have not taken this course-now
is the time...*

**Prerequisite for Course -1 Year of Self
Realization Class *see list of classes for the
year on last page*
