MEDIUMSHIP COURSE IS THIS MONTH

MEDIUMSHIP

Mediumship is that part of the course work that deals with the development of one's psychic unfoldment. A medium is one who "channels" communication between the Earth Plane and the Spirit World. It is used as a means of effecting or conveying something (information) from the invisible to the visible.

Learning how to develop and use one's psychic abilities is a process of spiritual growth and is a very important aspect of one's natural evolution on one's spiritual path. The development of one's mediumship skills requires application just as it would in the development of any other skill. Through application and the demonstration of these skills, one will develop confidence and an increase of awareness of one's inner world and how to use this guidance in one's outer world (as within...so is without).

It is important to remember that the development of one's psychic abilities is primarily for one's own spiritual growth and development and not for "just" giving out psychic information to others. The more information that one shares with others, the more they will have for themselves. This information is for the taking of correct "action" in one's life.

Suggested activities for class participation:

1. Continue becoming familiar with one's guides, controls, mentors, etc., through meditation. Emphasis on feelings while receiving impressions, colors and

energies.

2. Rose Meditation - see handout.
3. Messages - format, symbols, colors, aura.
4. Giving out of messages - Start with a symbol and expand from that symbol until you can do a 15 minute reading.
5. Option: At this time you may also want to continue working on aura readings, Psychometry readings, mini-readings, etc.
6. Channeled readings

This section of the course materials will be dictated by the individuals participating in the class. It will be up to the spiritual guidance of the teacher to recognize where each

individual **IS** to determine the application of mediumship.

Mediumship is what deals with the development of one's psychic unfoldment. A medium is one who "channels" communication between the Earth Plane and the Spirit World. It is used as a means of effecting or conveying something (information) from the invisible to the visible. The foundation for mediumship, the highest morality and the greatest aspirations for the good, is present in the one that develops, and earnest effort and joyfulness fill the heart.

Learning how to develop and use one's psychic abilities is a process of spiritual growth and is a very important aspect of one's natural evolution on his/her spiritual path. The development of one's mediumship skills requires

application just as it would in the development of any other skill. Through application and the demonstration of these skills, one will develop confidence and an increase of awareness of one's inner world and how to use this guidance in one's outer world (as within...so is without).

Mediumship makes it possible to discern temperaments, dispositions, capacities, motives, desires, moral, mental and physical conditions of living people. It is important to remember that the development of one's psychic abilities is primarily for one's own spiritual growth and development and not for "just" giving out psychic information to others. The more information that one shares with others, the more that they will have for themselves. This information is for the taking of correct "action" in one's life. It is important to be in command of one's mind.

If development is done improperly damage can occur mentally and physically. A proper development of mediumship strengthens the moral character, and prepares one to meet life in a calm and confident manner. It unfolds the spiritual nature, develops optimistic and trustful qualities, and helps the medium to realize more fully the beauty in life, that all things work together for good, and that in the ultimate every soul will find its spiritual center when all will be well.

One is the controlling factor. The Spiritual entities are in the Spiritual world and human beings are still in the physical world. Remember that one has chosen the physical world to do the experiences of the Earth plane. Do not let the Spirit world live one's life. You live it.

Mediumship developed now is carried on when you make the transition to the spirit world. Your perception is clear, and you can communicate with the earth plane, with your mediumship.

The **Spiritual world is not responsible** for doing what is correct for you. They are to assistance in your growth and development, not to do it for you. Your mission is in correct alignment with what your Mentors, Guides and Controls. As you grow, so does your team grow!

Mediumship is knowing the laws of the universe and living in accordance with those laws.

PROTECTION

The first thing that you learn in Mediumship is to remain conscious and alert and not fall into "automatic pilot." The second step is to be in command of negative thoughts.

Always remember that, in truth, you are God, and as you realize this potential you are no longer a victim of anything; you are then a total master and the cause of your reality.

It is important every day to put on your mental armor. This should be done every morning, before retiring for the day, and before doing any spiritual work. This means putting on your personal power, self-mastery, invulnerability, unconditional love, attunement to God, self-love, and centeredness.

In the beginning, it will be necessary to do this protecting three to four times a day. The more you do this protection, it becomes stronger and will last longer. As one becomes proficient doing the protection, doing it when one starts their day and when one finishes the day will be sufficient. Let this protection become a part of you, like washing your body.

One does this consciously and with intent. Visualize or sense any - or all - of the following:

- Your favorite color.
- A feeling that you once experienced where you felt very protected and nothing could hurt you.
- Merge your favorite color and the feeling, with concentration(thoughts/words) that only the highest and best will penetrate, as you rap the color and feeling around and through your body like a mummy.
- At first this will take some time, after a period this will take less time and will last longer. At first, you will do this protection three to four times a day.
- The more you do this the longer the protection will be with you.

A prayer of protection is also a useful tool to align your mind with the way you want to create your day. The following are several prayers of protection.

- The Lord's Prayer
- "I am clothed with a robe of Light composed of the love, wisdom, and power of God, for my protection,

and that all who see it or come in contact with it will be drawn to the highest and best and healed."

- "I send negativity to the Universe to be dissolved, decreeing that it is transmuted to the highest and best. I now ask that I be placed within the Universal Light of protection, and for this blessing, I give thanks. Amen."
- "In the center of Light I stand. All that is happy, healthy, and wealthy touches me now."
- "I invoke the Light of Christ.
I am a clear channel.
Light is my guide."

The other quality needed for protection is that of spiritual discernment. It is very important not to give away your power so easily. Don't give your power away to anyone or anything.

Give positive and constructive instruction to your thoughts, feelings, physical body, subconscious mind, other people, past lives, inner child, sub personalities, outside energy, ascended masters, spirit guides, or a guru. Any spiritual teacher worth their weight will be encouraging you to own your power and to recognize your equality.

REMEMBER: Your energy flows where your attention goes. Focus on protection, not the negativity that is around you! Knowing you are one with God, then that is who you are.
